Professional Profile

A seasoned AI data specialist with a robust foundation in computational linguistics and ethical machine learning systems. Backed by over four years of freelance experience supporting annotation pipelines, classification tasks, and linguistic modeling. Adept at managing large-scale datasets and constructing prompts for diverse model training objectives. Strong familiarity with UK policy guidelines and content sensitivities in AI applications.

Key Skills

Prompt Development (Single-turn & Multi-turn)

Semantic Tagging & Text Categorization

Conversational AI Dataset Curation

Policy-driven Content Labeling

Contextual Moderation (Bias, Hate Speech, Violence)

Project Collaboration in Remote AI Teams

UX-Driven Prompt Iteration

Workflow Optimization using Excel & Python

Professional Experience

Freelance AI Data Specialist
Remote (2019–Present)

Delivered tailored annotation solutions for LLM fine-tuning and alignment scoring tasks.

Generated policy-compliant prompts in sensitive areas (legal, medical, political).

Conducted in-depth quality reviews to maintain alignment with evolving dataset needs. Participated in beta testing prompt interfaces for emergent AI models.

Education

BSc Computational Linguistics
University of Exeter – Graduated 2020

Technical Tools

Labelbox | LightTag | Prodigy

Microsoft Excel | Python (Pandas, NLTK)

Airtable | Google Sheets | ChatGPT (Advanced Mode)

Certifications

LLM Alignment & Evaluation – DeepAI Institute

Applied Linguistics for NLP – Online Learning Hub

AI Prompt Design Workshop – PromptCraft UK

Languages

English (Native)

Spanish (Conversational)
